

Crosstrack at Infradek

The Smarter Raised Floor System for Modern Commercial Fitouts

Modular. Reusable. Future-Ready.

Infradek is proud to offer Crosstrack, the Australian-designed low-profile raised flooring system that's changing the way commercial spaces are built and adapted.

Whether you're managing power, data in a modern workspace or retail environment, Crosstrack gives you complete control beneath the floor without compromise.

What is Crosstrack?

Crosstrack is a dry raised floor system designed to support and reticulate cabling for power and communications services beneath a solid platform that blends seamlessly with your interior finishes. It's faster to install, easier to reconfigure, and more sustainable than traditional access floors.

No Wet Trades

Rapid Install 300 – 500
m² per day typical

76mm Floor Height

100% Reconfigurable and Reusable

Simple Drop-In Service Boxes

Why Choose Crosstrack through Infradek?

End-to-End Support

From specification through to install, we help your team get the most from the Crosstrack system whether it's a 1000m² office or a complex server room.

Design for NZ, Australian and International Standards

We configure layouts to meet seismic and building compliance for New Zealand projects.

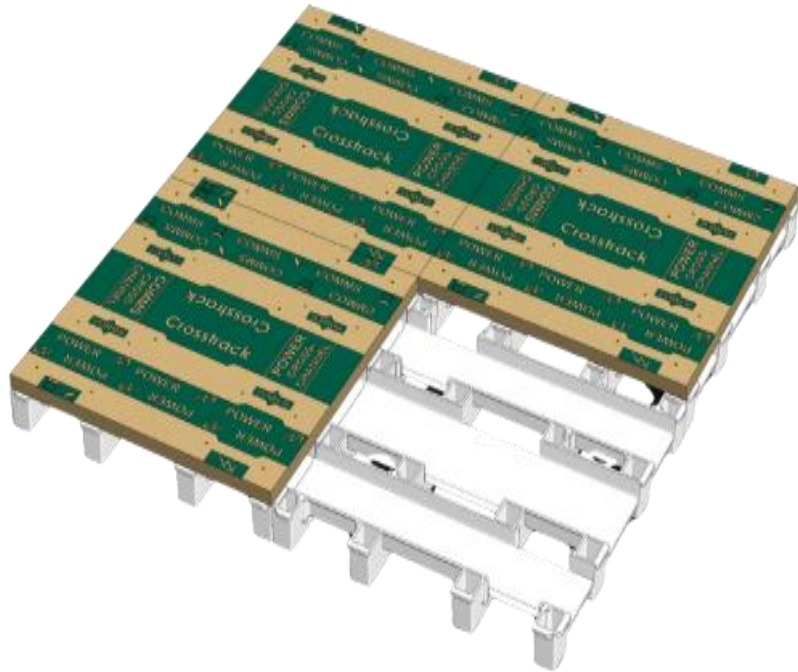

Stock Holding & Fast Turnaround

With access to local and Australian inventory, we can meet tight project schedules.

Sustainable Construction

Components are fully reusable and recyclable ideal for green buildings and adaptive reuse.

Applications

- Commercial offices
- Government fitouts
- Education and training centres
- Control rooms and tech spaces
- Retail showrooms
- Agile workspace configurations

Tech Highlights

Feature	Details
System Height	76mm
Installation Speed	300 - 500 m ² per day
Cable Access	flush service outlets
Reusability	Installation can be lifted and reinstalled
Load Rating	Optimised for typical commercial use
Finish Options	Accepts carpet tile, vinyl, laminate, and more
